#5A3A93

☒ Ledger sealed

Epoch 12 closed with 16 events. Chain intact.

☒ Refusal recorded

Collapse of 0007 was declined under constraint C.

☒ Repair available

One repair restores admissibility. Review before commit.

About this document

How it is built.

Ledger digests are MD5 chain values computed at compile time (`\pdf@mdfivesum`); events come from an `expl3` linear congruential generator. Window chrome dispatches through `\csname`; the bubble text is set with a computed `\parshape`; the ring text follows an arc; the dock icons are hyperlinks; every page carries a PDF transition.
